## PROFILE SUMMARY

Hello. My name is Augustas - a fresh  programmer with aptitude and determination. I come from forestry and natural resource management background, where I was first exposed to programming through the use of modern mapping and data management technologies to support my daily work as a forest manager.

A year ago, I took a strategic approach to becoming a full-time developer by signing up for a Professional Software Development Bootcamp with CodeClan-Glasgow, and creating a study plan for preparation.

I have now completed the course and look to apply my skillset in a commercial setting, working with and learning technologies across the full stack spectrum.

## EDUCATION

### UNIVERSITY OF ABERDEEN

**Bachelor of Science in Forestry, 2010-2015,  
First Class (Hons), ICF Student Award(2015)**

Main courses:

- Advanced Scientific Writing
- Statistical Analysis of Biological Data
- Mapping and Monitoring the Environment
