PROFILE SUMMARY

I am a software developer with a background of forestry and natural resource management. I was driven to programming through the use of modern mapping and data management technologies to support my daily work as a forest manager.

I have taken a strategic approach to upskill as a full stack developer and join the industry to solve complex problems with technology.

TECHNICAL EXPERIENCE

PROFESSIONAL SOFTWARE DEVELOPMENT COURSE

Codeclan, Glasgow. January-April 2020.

A full-time, 16 week intensive course, teaching the fundamentals of software development, OOP, TDD, and Agile best practices. The course includes over 800 hours of instructor lead, group and solo coding as well as 3 full stack app projects. Achieved **Professional Development Award in Software Development, SCQF LEVEL 8(2020)**

Languages:

- JavaScript
- Java
- Ruby
- Python
- CSS & HTML

Frameworks:

- React
- Vue
- Spring
- Sinatra

Related tech:

- Node
- UNIX and Git
- Bootstrap, SASS

Databases:

- PostgreSQL
- MongoDB
- H2

Methodologies:

- Agile
- Object Oriented Programming
- Test Driven Development

RECENT PROJECTS

CODECLAN WORK (PART OF SCQF LEVEL 8) ONLINE SNEAKERS SHOP

https://github.com/UnmadeBed/Team_Project_Shop_App

A group project to create a simple e-commerce website. Java and Spring with H2 database were used to write the backend. Front end was created with React.js, including React Router and Create-React-App setup. Functionality to store and manage stock and users data, user login, card payments as well as front-end filter. Bootstrap and CSS media queries were used to create basic responsive design. This was a fully remote project that utilised Git and adhered to Agile principles.

DARK SCOTLAND

<https://github.com/augustas3000/DARK-SCOTLAND>

A web-app that provides information on spooky places across Scotland. Group project emphasising Node.js, Express, MongoDB and Vue.js and Vue router. The website allows user to view a list of spooky places, add to favourites, view description and location. The project took 7 days and involved a mix of class and remote work Agile approach.

ZEN GYM

<https://github.com/augustas3000/ZEN-GYM>

First solo project at Codeclan, utilising Postgres, and Ruby Sinatra to create a gym booking management system. Functionality to manage bookings and gym members, query these, and persist data.

PORTFOLIO WEBSITES
